

## SENIOR SOFTWARE ENGINEER

Infomedia is looking for a Senior Software Engineer to work within our Platform team to help deliver against our vision. The successful candidate will contribute to new and ongoing projects through standard development procedures to deliver quality components into our live environment.

Key responsibilities will include:

- Developing and deploying new projects into our live environment to the defined specification.
- Ensuring on-time delivery of high-quality, efficient, scalable and robust software deliveries
- Adhere to relevant coding standards and industry best practices
- Liaising with project teams to communicate project progress and raise risks with potential solutions for completion of project in a timely manner
- Updating platform documentation in-line with new deliveries
- Supporting and mentoring other members of the Platform team to ensure relevant coding standards and industry best practices are adhered to during development of our platform
