<b>Team</b>	Technology
<b>Line Manger</b>	Chief Technology Officer
<b>Date</b>	1 <sup>st</sup> May 2018
<b>Full/Part Time</b>	Full-time
<b>Salary</b>	£37,000 - £45,000

### Role Description

We're looking for a talented, passionate and collaborative Test Lead to come and join our rapidly growing Technology department. We are a small, friendly organisation that sees our culture and the way we develop our people as absolutely central to everything that we do. Our start-up nature throws up opportunities and challenges on a daily basis and the successful candidate will thrive in this sort of environment.

You will contribute to the ongoing projects through standard testing cycles but will also work on improving the production environment by improving the testing and rigor of software on or entering the live environment. Key responsibilities will include:

- Ownership of the test strategy which should be in line with the overall Platform strategy and harmonious with the development strategy
- Create, manage and own detailed test plans, cases and scripts for all platform components, integrations and projects that pass through the team.
- Drive a programme of work to deliver automated Blackbox testing on all platform components and integrations
- Work with the Application Development and Application Management teams to introduce and deliver automated Whitebox testing across key components and integrations
- Assure the stability of platform in the live environment
- Document, Plan and manage all UAT. Then working with the Test team or Operational teams ensure a robust execution approach is put in place.
- Document, plan and execute a programme of work to improve the partner integration and accreditation into our platform for improved quality and speed.

What you need:

- Experience implementing and executing test strategies
  - Knowledge of the test automation of technical platforms (UFT, Selenium, Load runner, JMeter etc)
  - Demonstrable experience in implementing systems to drive systemic improvements in test to help drive forward the improvements of technology projects.
  - Knowledge and experience of improving the quality and time to integrate 3<sup>rd</sup> parties into a technology platform. E.g. standardizing externally facing test plans and test cases, creating and managing technical accreditation, streamlining UAT sign off, etc
  - Self-starter with a 'can do' attitude for solving problems to help the wider project team predict, identify and resolve roadblocks
  - Great interpersonal skills as you will be collaborating with cross functional teams for most projects
  - Desire to work in a fast paced, dynamic and fun team setting where we are all aligned in delivering projects
-

What we will do for you:

- Give you exposure to wide-ranging projects using different
- Help you grow in your technical knowledge. We provide structured time in the month for your training. E.g. time on Plural Site and Udemy, going to partner workshops or seminars (Rackspace, Microsoft, Akamai, etc), hackathons, etc. We also provide support training from the wider business to enhance your other skills around Project Management, Service Management, Commercial exposure, etc.
- Be flexible with working locations and times. With the ability to work from home during projects, we will listen to your needs and provide the best possible work/life solutions that deliver for both you and the project.

### Knowledge, Skills & Attributes

#### Knowledge:

- Experience in managing testing structure, approach & methodologies.
- Planning, executing and managing partner UAT & technical accreditation into your platform for improved integration speed and quality
- Building and managing test environments
- Implementing Whitebox and Black box testing strategies
- Building robust Test automation (API and Web)
- Working within a high transactional business
- Functional and Non-Functional testing knowledge and experience and executing both types on a software platform

#### Skills:

- Building and executing high level and detailed Test strategies
- Creation and management of test plans, cases and scripts
- Automation of testing (API and Web)
- Testing web applications, Web API's, Windows Service and Mobile Applications
- Bringing in and managing UAT systems and processes
- Ability to manage multiple projects at different points in life cycle
- Management of appropriate testing toolset e.g. HP UFT

#### Attributes:

- Communication – written and verbal. To senior management and team
- Ability to report in cross functional project teams
- Approachable and constructive in solving issues
- Organisational. Area, team, projects, etc
- Methodical in testing approach to ensure all positive and negative testing is completed
- Risk management - ability to understand, manage and communication risks appropriately

### Company Description

**Infomedia**

# Role Description

## Test Lead

---

Established in 1991, Infomedia has transitioned with changing consumer behaviour on the mobile platform to become one of the most trusted global players in the Direct Carrier Billing (DCB) market. The business continues to grow rapidly with unique global carrier relationships and a current reach of over 200 million customers transacting over its platform. Infomedia's revenue has grown by an average of 49% YoY over the last five years by developing new use cases for direct carrier billing, ignoring short-term traditional Value-Added Service (VAS) revenues and focusing on launching compelling new services tailored for DCB.

Infomedia has a fully-managed service offering. This allows brands and carriers to simply 'plug in and play' to start generating revenue from micropayments on mobile. Services are typically live within weeks and generating a ROI within a few months. Infomedia enables carriers to leverage their current billing system and relationship with the customer to increase ARPU (average revenue per user) and allows brands to monetise digital in a way that is suited to growing consumer trends for frictionless payments, snacking content and the micro subscriptions.

The team has ambitions to maintain its steep growth curve by further expanding internationally and enabling a broad range of brands from publishers to car parks to maximise revenue on the mobile channel. At the same time, Infomedia is committed to driving quality in the market and working with regulators to create a more modern compliance framework that allows brands and carriers to benefit from the demand for frictionless mobile payments whilst safeguarding consumers.
