

Role	Test Executive
Team	Technology
Line Manger	CTO
Date	3 rd January 2019
Full/Part Time	Full-time
Salary	£28,000 - £35,000

Role Description

We're looking for a talented, passionate and collaborative Test Executive to work in our rapidly growing Application Development team. We are a small, friendly organisation that sees our culture and the way we develop our people as absolutely central to everything that we do. Our start-up nature throws up opportunities and challenges on a daily basis and the successful candidate will thrive in this sort of environment.

The successful candidate will contribute to the ongoing projects through standard testing cycles but will also work on improving the production environment by improving the testing and rigor of software on or entering the live environment.

What you'll do:

- Create and manage detailed test plans, cases and scripts for platform components, integrations and projects that are assigned.
- Work on a series of projects to continually drive the improvement of regression testing across platform components and integrations.
- Work with the Test Lead, Service Management and Business Owners to put in place appropriate and scalable UAT processes, systems and execution steps to help improve the quality of services and software release by the business.
- Work with the Test Team to improve our blackbox and whitebox automated testing coverage
- Aid in the assurance of the stability of platform in the live environment

What we will do for you:

- Help you grow in your technical knowledge. We provide structured time in the month for your training. e.g. time on Plural Site and Udemy, going to partner workshops or seminars (Rackspace, Microsoft, Akamai, etc), hackathons, etc. We also provide support training from the wider business to enhance your other skills around Project Management, Service Management, Commercial exposure, etc.
- Listen to your ideas for how we can progress our technology stack, systems and process. You will help define the technologies we use for our projects. We believe in working collaboratively to get the best results possible
- Be flexible with working locations and times. With the ability to work from home during projects, we will listen to your needs and provide the best possible work/life solutions that deliver for both you and the project.

Knowledge, Skills & Attributes

Knowledge:

- Working knowledge of using various testing methodologies
 - Executing Whitebox and Black box testing
-

- Testing Functional Test projects of a software platform
- Optional: Working within a high transactional business
- Optional: Managing and using test environments
- Optional: Knowledge of Non-Functional testing and the tool sets needed.

Skills:

- Building and executing h detailed Test cases and test scripts
- Testing web applications, Web API's, Windows Service and Mobile Applications
- Managing UAT testing
- Ability to execute on multiple projects at different points in life cycle
- Optional: Automation testing
- Optional: Management of appropriate testing toolset e.g. HP UFT
- Optional: Execution of non-functional testing

Attributes:

- Communication (progress updates, documentation, scrums, etc)
- Approachable
- Analytical (problem solving)
- 'Can do attitude
- Desire to work in a fast paced, dynamic and fun team setting where we are all aligned in delivering projects
- Willingness to learn

Company Description

Established in 1991, Infomedia has transitioned with changing consumer behaviour on the mobile platform to become one of the most trusted global players in the Direct Carrier Billing (DCB) market. The business continues to grow rapidly with unique global carrier relationships and a current reach of over 200 million customers transacting over its platform. Infomedia's revenue has grown by an average of 49% YoY over the last five years by developing new use cases for direct carrier billing, ignoring short-term traditional Value-Added Service (VAS) revenues and focusing on launching compelling new services tailored for DCB.

Infomedia has a fully-managed service offering. This allows brands and carriers to simply 'plug in and play' to start generating revenue from micropayments on mobile. Services are typically live within weeks and generating a ROI within a few months. Infomedia enables carriers to leverage their current billing system and relationship with the customer to increase ARPU (average revenue per user) and allows brands to monetise digital in a way that is suited to growing consumer trends for frictionless payments, snacking content and the micro subscriptions.

The team has ambitions to maintain its steep growth curve by further expanding internationally and enabling a broad range of brands from publishers to car parks to maximise revenue on the mobile channel. At the same time, Infomedia is committed to driving quality in the market and working with regulators to create a more modern compliance framework that allows brands and carriers to benefit from the demand for frictionless mobile payments whilst safeguarding consumers.
